Official Token Information & Transparency Statement
USI Moonik Token (USI) – BNB Smart Chain

This page is provided specifically for blockchain explorer verification,
including BscScan, and for public transparency.
It contains complete and factual information about the identity,
ownership, technical structure, and non-financial nature of the project.

This document is informational only and does NOT contain
any promotional, investment, or financial content.

1. Project Identification & On-Chain Metadata

USI Moonik Token (USI) is a standard BEP-20 token deployed on the
BNB Smart Chain. All token parameters are permanently recorded on-chain
and can be independently verified through BscScan or any compatible explorer.

The purpose of publishing these details is to eliminate ambiguity and
provide clear identification for reviewers and users.

Token Name: USI Moonik Token
Symbol: USI
Standard: BEP-20
Network: BNB Smart Chain
Decimals: 18
Total Supply: 999,000,000,000 (fixed and immutable)
Contract Address: 0x349dC946aC011F2d22a10801AeAf1ef46B1ef6Ef
Source Code Status: Fully Verified on BscScan
Initial Mint: One-time mint at deployment only

No additional tokens can ever be created.
The supply cannot be increased, modified, or reissued.

2. Project Purpose (Clear, Neutral & Non-Financial)

USI Moonik Token exists solely as an educational and transparency-focused
blockchain reference project.

Its objective is to demonstrate how a simple, fixed-supply,
fully verifiable BEP-20 token operates on-chain.

The token is used for:
- Technical learning
- Smart contract demonstration
- Testing and experimentation
- Public verification of blockchain behavior

The project does NOT pursue commercial, financial, or speculative activities.

3. Explicit Non-Financial Declaration

To avoid misunderstanding, the project explicitly confirms that it is NOT:
- An investment product
- A security or share
- A fundraising vehicle
- A profit-generating instrument
- A revenue-sharing mechanism

The project has NEVER conducted and will NEVER conduct:
- ICO / IEO / IDO

- Private or public token sales
- Presales or fundraising rounds
- Airdrops with financial incentives
- Staking, yield, or reward programs

No promises of profit, appreciation, or trading opportunities are made.

4. Smart Contract Technical Properties

The smart contract was intentionally designed to be minimal,
predictable, and free from hidden behavior.

- Verified open source code on BscScan
- No mint function
- No burn function
- No transaction taxes or fees
- No blacklist or whitelist
- No freeze or pause features
- No administrative balance control
- No proxy or upgrade system

Because of these restrictions, neither the owner nor any third party
can alter user balances or interfere with transfers.

All behavior is permanently determined by the deployed code.

5. Ownership, Founder & Team Accountability

BscScan transparency standards require clear identification of responsible persons.
The following individuals are directly accountable for the project.

Founder & Contract Owner
Name: usi moonik
Role: Original deployer and current contract owner
Responsibility: Contract deployment, website ownership, and official communication

Ownership exists only for transparency and administrative clarity.
It does NOT provide financial or balance manipulation powers.

Core Team Members
Amob Animo – Technical Lead
Smart contract review, code validation, GitHub maintenance, and technical consistency.

Houno Minp – Documentation & Communications Lead
Documentation accuracy, educational materials, and public updates.

All listed members are real, identifiable individuals directly involved in the project.
No anonymous controllers or hidden operators exist.

6. Authenticity & Non-Misrepresentation Statement

All information provided by USI Moonik is original and truthful.

- No copied branding
- No impersonation of other tokens or companies
- No fabricated partnerships
- No misleading claims
- No false affiliations

The project does not claim any relationship with Binance,

BNB Chain, or any external institution.

Every statement can be independently verified using public sources.

7. Official Website & Contact

- Bitcointalk: https://bitcointalk.org/index.php?topic=5570878

These channels are used only for transparency and education.
No financial promotion is published.

10. Final Compliance Statement

All project information is:
- Accurate
- Publicly verifiable
- Consistent across all sources
- Non-promotional

USI Moonik Token exists solely as an educational,
transparent, and immutable blockchain demonstration.

This submission is provided strictly for BscScan identification
and compliance purposes.
